REPORTING

Heartland Pathology Consultants pathology reports are currently available via auto-fax, hard copy delivery and/or online through our secure, password protected web site. "Outreach" reports allow the client to look up, print or email patient reports from their PC. This Internet service is greatly appreciated by both physicians and medical records staff.

HPC maintains our own laboratory information system that currently handles all of our reporting and has been interfaced easily to other information systems. We would like to explore your specific needs and demonstrate that our system is as flexible and robust as those offered by other commercial laboratories. As an independent laboratory, we are able to react quickly to your changing IT needs. Heartland Pathology Consultants, PC, meets "Meaningful Use" criteria. Contact Robin Crowder at 405.705.2639 for more information.
